We are currently seeking volunteers to train for our Master Gardener Programs in Clinton and Essex Counties. There is a considerable time commitment to the program but the rewards are many. You can feel good about teaching and helping others, and learn a lot about your favorite subject, gardening, in the process. A practical, hands-on style of presentation will be used, with emphasis on trouble shooting, prevention, using environmentally-friendly methods of plant health care, and Integrated Pest Management to protect soil, plants and the environment.

**MASTER GARDENER VOLUNTEER RESPONSIBILITIES...**
- A minimum of 50 hours of approved volunteer activities.
- Regular attendance at monthly Master Gardener meetings during the year (2nd Thursdays in Plattsburgh, 2nd Fridays in Westport).
- Continuing education is critical and will be provided at monthly meetings and periodic training sessions.
- Represent Cornell Cooperative Extension in providing reliable, unbiased information to the public.

**EXAMPLES OF MASTER GARDENER VOLUNTEER PROJECTS...**
- Answering individual gardening questions
- Creating educational exhibits
- Staffing exhibits at local events and farmers’ markets, etc.
- Assisting 4-H clubs or schools with gardening projects
- Advising community members and groups on gardening projects
- Teaching and/or helping with horticultural workshops
- Approved special projects of interest

If you are interested or have questions, please contact your county Cornell Cooperative Extension office
